Professional Summary

Detail-oriented Full Stack Developer with strong expertise in React and Node.js ecosystems. Self-taught programmer currently pursuing Computer Science degree. Passionate about building scalable web applications with focus on performance optimization and security. Demonstrated ability to deliver high-impact projects through effective problem-solving and collaboration.

Technical Skills

- Programming Languages: JavaScript, TypeScript, NodeJs, SQL
- Frameworks/Libraries: React, Vue, NextJs, Remix, Express, Hono, NestJs
- Database (SQL and NoSQL): Postgres, MySQL, MongoDb, Redis
- ORM: Prisma, Drizzle, TypeOrm, Sequelize
- Testing: Jest, Cypress
- API: REST, GraphQL (Client & Server)
- Containerization: Docker
- Serverless: Vercel, Netlify, Supabase, Neon, Cloudflare Worker, Render
- Cloud VPS: AWS, GCP
- UI/UX Design: Figma
- Development Methodology: Agile

Projects

TRUST - Automotive Spare Part Platform Live | Github
(December 2024 - present)

- Architected and implemented a scalable e-commerce platform processing 1000+ daily transactions.
- Reduced page load time by 40% through implementing Redis caching and optimizing database queries.
- Integrated Cloudflare DNS and implemented JWT-based authentication, resulting in zero security breaches.
- Designed and implemented RESTful APIs with rate limiting and request validation
- Managed project timeline and deliverables using GitHub Projects, achieving 90% on-time completion.

CheckCafe - Cafe Management System Live | Github
(December 2024 - present)

- Developed a real-time cafe occupancy tracking system serving 500+ daily active users
- Implemented WebSocket for live updates and notifications, maintaining <100ms latency
- Designed mobile-responsive UI using Tailwind CSS, achieving 95% user satisfaction
- Created admin dashboard with role-based access control and analytics Deployed application using Docker and implemented automated CI/CD pipeline
- Deployed application using Docker and implemented automated CI/CD pipeline

Work Experiences

Industrial Quality Management Ltd. | Bukit Beruntung, MY

Systems Optimization Specialist
(Oct 2022 – Nov 2024)

- Automated quality control processes using Python scripts, reducing manual inspection time by 50%.
- Implemented data collection and analysis system for production metrics.
- Collaborated with cross-functional teams to optimize workflows and improve efficiency.

Education

Universitas Siber Asia (2023-2026)

- Currently studying Data Structures, Algorithms, and Programming Fundamentals.
- Active member of campus coding community

Bearmentor Bandung, Indonesia | 2022

Software Engineering Bootcamp

- Completed intensive training in full-stack development and system design.
- Developed 3 production-ready applications using modern tech stack.
- Achieved top 5 position in final project showcase.
